Contents of Vol. 155

Issue number 1

ELECTRONICS AND OPTICS

An investigation of conductivity in metal-substituted phthalocyanine Langmuir–Blodgett films . . 1
F. W. Kutzler, W. R. Barger, A. W. Snow and H. Wohltjen (Washington, DC, U.S.A.)

The optical properties of YF_3 films 17
D. F. Bezuidenhout, K. D. Clarke (Pretoria, South Africa) and R. Pretorius (Faure, South Africa)

Al–PbO–Ag as a solid electrolyte cell 31
D. M. Uzagare (Ahmednagar, India) and R. N. Karekar (Pune, India)

PREPARATION AND CHARACTERIZATION

Deposition of Si_xC_{1-x}:H films by reactive r.f. sputtering 39
W. Weisweiler, G. Nagel and J. Klepp (Karlsruhe, F.R.G.)

Synthesis and properties of thin film polymorphs of molybdenum trioxide 53
P. F. Carcia and E. M. McCarron III (Wilmington, DE, U.S.A.)

Thin films prepared from tetramethyltin 65
C. Oehr and H. Suhr (Tübingen, F.R.G.)

CO_2-laser-induced chemical vapour deposition of polycrystalline silicon from silane 75
D. Tonneau, G Auvert and Y. Pauleau (Meylan, France)

The effects of deposition variables on deposition rate in the chemical vapour deposition of silicon nitride 87
K.-S. Yi, J.-B. Kim, K.-J. Kim and J. S. Chun (Seoul, South Korea)

Properties of polycrystalline silicon grown on insulating substrates by electron beam gun evaporation 97
N. K. Annamalai (Hanscom, MA, U.S.A.), N. Meyyappan and A. N. Khondker (Potsdam, NY, U.S.A.)

Anodic oxidation of niobium in aqueous solution of weak organic acids 115
R. K. Nigam, K. C. Singh and S. Maken (Haryana, India)

Non-destructive determination of free carrier density of epitaxial layers of GaSb by IR reflectivity measurement 125
S. Schirar, L. Bayo, A. Melouah, J. Bougnot, C. Llinares, A. Montaner and M. Galtier (Montpellier, France)

Investigation of plasma-grown planar alumina films for use in the modeling of bulk alumina 133
D. E. Halverson and D. L. Cocke (College Station, TX, U.S.A.)

GENERAL FILM BEHAVIOUR

Effects of process parameters on the ionization in triode ion plating 143
K. Salmenoja, J. Molarius and A. Korhonen (Espoo, Finland)

Accuracy of digital Fourier transformation detection systems for high speed rotating analyser ellipsometers 151
K. Riedling (Vienna, Austria)

Thermal diffusivity measurement of micron-thick semiconductor films by mirage detection 165
J. P. Roger, F. Lepoutre, D. Fournier and A. C. Boccara (Paris, France)

LETTERS

Effects of a silicon substrate on surface plasmon spectra in silver island films. L1
J. L. Bijeon, P. Royer, J. P. Goudonnet, R. J. Warmack and T. L. Ferrell (Oak Ridge, TN, U.S.A.)

Thermally stimulated currents in thin amorphous GeS films L5
H. Kasica, E. Staryga, A. Lipiński (Łódź, Poland), A. Stanchev and C. Vodenicharov (Sofia, Bulgaria)

CORRIGENDUM L9

Issue number 2

ELECTRONICS AND OPTICS

In situ electrical property measurements of metal/(plasma polysiloxane)/metal structures 175
Y. Segui, D. Montalan and G. Bacquet (Toulouse, France)

IR studies of pyroelectric Langmuir–Blodgett films 187
C. A. Jones, M. C. Petty, G. G. Roberts, G. Davies, J. Yarwood (Durham, U.K.), N. M. Ratcliffe and J. W. Barton (Bristol, U.K.)

Thermoelectric properties of $Bi_{1-x}Sb_x$ films with $0 < x \leqslant 0.3$ 197
F. Völklein and E. Kessler (Jena, G.D.R.)

A comparison of the median time to failure with temperature-ramp resistance analysis to characterize electromigration to determine electromigration kinetic parameters 209
L. E. Felton, J. A. Schwarz (Syracuse, NY, U.S.A.) and J. R. Lloyd (Hopewell Junction, NY, U.S.A.)

Optical properties of the thermal oxide–GaAs rough interface 217
Y. Gaillyová (Brno, Czechoslovakia)

PREPARATION AND CHARACTERIZATION

Characterization of microcrystallinity in hydrogenated silicon thin films 227
C. Godet (Orsay, France), B. Marchon (Thiais, France) and M. P. Schmidt (Palaiseau, France)

Interfacial reactions in bimetallic Ag–Sn thin film couples 243
S. K. Sen, A. Ghorai, A. K. Bandyopadhyay and S. Sen (Calcutta, India)

Surface properties of a long-chain 10:12 diynoic acid monolayer at air–liquid and solid–liquid interfaces 255
N. F. Owens, D. S. Johnston, D. Gingell and D. Chapman (London, U.K.)

The initial nucleation and growth of gold on sodium chloride for substrate temperatures between 123 and 448 K 267
B. F. Usher and J. L. Robins (Nedlands, Western Australia, Australia)

Détermination du profil de concentration de la couche de transition des hétérostructures $Ga_{1-x}Al_x/GaAs$ par rendement de photoémission X 285
A. Bouabellou (Constantine, Algeria), V. N. Schemelev and I. R. Taguirov (Leningrad, U.S.S.R.)

Determination of the thickness of thin titanium dioxide films from photoacoustic interference signals 295
G. Heinrich and H. Güsten (Karlsruhe, F.R.G.)

IR transmittance studies of hydrogen-free and hydrogenated silicon nitride and silicon oxynitride films deposited by reactive sputtering 301
D. Schalch, A. Scharmann and R. Wolfrat (Giessen, F.R.G.)

Preparation and study of sulphide thin films deposited by the dip technique 309
M. K. Karanjai and D. Dasgupta (Darjeeling, India)

Determination of $CuInSe_2$ thin film compositions by controlled-potential coulometry 317
M. H. Yang, M. L. Lee, Y. M. Lin and H. L. Hwang (Hsinchu, Taiwan)

Depth profile measurements of aluminium film on phosphorus-doped hydrogenated amorphous silicon layers by Auger electron spectroscopy 325
S.-I. Ishihara and T. Hirao (Osaka, Japan)

Raman scattering analysis of disorder in heterogeneous $(GaAs)_{1-x}(SiC_2:H)_x$ films grown by metal–organic chemical vapour deposition 331
F. Maury, R. Carles, G. Landa and J. B. Renucci (Toulouse, France)

X-ray diffraction and optical studies of Langmuir–Blodgett films formed from azobenzene derivatives 343
R. H. Tredgold, R. A. Allen and P. Hodge (Lancaster, U.K.)

LETTERS

Drawing fine patterns on *N*-octadecylacrylamide Langmuir–Blodgett multilayers: a new class of ultrathin resists. L11
T. Miyashita, H. Yoshida and M. Matsuda (Sendai, Japan)

Reply to comments on "Spectrally selective surfaces on stainless steel produced by chemical conversion." L15
C. S. Uma, L. K. Malhotra and K. L. Chopra (New Delhi, India)
